

Git workflow

1. Välj en task att arbeta med.
2. Skapa en branch för tasken och namnge den med ett bra namn så man vet vilken task den tillhör. Föreslår att vi håller branchnamnet väldigt tydligt kopplat till taskens innehåll och sedan använder samma namn för pull-requesten och sedan mastermerge-commiten.

- a.
3. Gör en pull och byt till din nya branch.

```
anton@LAPTOP-ALQBJKC2 MINGW64 ~/Documents/Java EE
$ cd my-test

anton@LAPTOP-ALQBJKC2 MINGW64 ~/Documents/Java EE/my-test (master)
$ git pull
From https://github.com/blixtr/my-test
* [new branch]      myBranch -> origin/myBranch
Already up to date.

anton@LAPTOP-ALQBJKC2 MINGW64 ~/Documents/Java EE/my-test (master)
$ git checkout myBranch
Switched to a new branch 'myBranch'
Branch 'myBranch' set up to track remote branch 'myBranch' from 'origin'.

anton@LAPTOP-ALQBJKC2 MINGW64 ~/Documents/Java EE/my-test (myBranch)
$
```

- a.
4. Börja arbeta på tasken i din nya branch.
 5. När du känner dig klar så pusha upp och skapa en pull request. Det kan vara bra att göra en koll på github så att allt ser bra ut innan man skapar sin pull request då man får en bra och tydlig översikt på alla ändringar där. Namnge pull requesten med samma namn som branchen.

```

anton@LAPTOP-ALQBJKC2 MINGW64 ~/Documents/Java EE/my-test (myBranch)
$ git status
On branch myBranch
Your branch is up to date with 'origin/myBranch'.

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git checkout -- <file>..." to discard changes in working directory)

        modified:   src/com/blixtr/Main.java

no changes added to commit (use "git add" and/or "git commit -a")

anton@LAPTOP-ALQBJKC2 MINGW64 ~/Documents/Java EE/my-test (myBranch)
$ git add .

anton@LAPTOP-ALQBJKC2 MINGW64 ~/Documents/Java EE/my-test (myBranch)
$ git commit -m "My commit message"
[myBranch 2e67e37] My commit message
1 file changed, 1 insertion(+), 1 deletion(-)

anton@LAPTOP-ALQBJKC2 MINGW64 ~/Documents/Java EE/my-test (myBranch)
$ git push

Unified Split

```
src/com/blixtr/Main.java
@@ -3,6 +3,6 @@
3 3 public class Main {
4 4
5 5 public static void main(String[] args) {
6 - System.out.println("NEW STUFF");
6 + System.out.println("I MADE THIS CHANGE");
7 7 }
8 8 }
```

c.

6. Skriv på slack att du har öppnat en pull request så att någon kan kolla på den
7. Invänta kommentarer eller en godkänd pull request
 - a. Du som reviewar går in på pull requesten och lägger kommentarer vid behov. När du tycker allt ser bra ut så väljer du "Approve" via "Review changes"-dropdownen uppe till höger.

8. Vid godkänd pull request så kan du merge in den till master med "Squash and merge". När du väljer squash and merge så behöver du ange commit-message som bör vara samma som branchnamnet.

myBranch #2

Open blixtr wants to merge 1 commit into master from myBranch

Conversation 0 Commits 1 Checks 0 Files changed 1 +1 -1

blixtr commented 35 minutes ago

No description provided.

My commit message 2e67e37

Add more commits by pushing to the myBranch branch on blixtr/my-test.

Continuous integration has not been set up
GitHub Actions and several other apps can be used to automatically catch bugs and enforce style.

This branch has no conflicts with the base branch
Merging can be performed automatically.

Squash and merge You can also open this in GitHub Desktop or view command line instructions.

Create a merge commit
All commits from this branch will be added to the base branch via a merge commit.

Squash and merge
The 1 commit from this branch will be added to the base branch.

Rebase and merge
The 1 commit from this branch will be rebased and added to the base branch.
